

SuperSonic

Ultra Compact 12" Compound Compression
Powered Subwoofer

WARNING:
Don't Let the Size Fool You!
These Small Subs Produce Great Bass!

Only a 15" Cube!

The **SuperSonic** uses the same space saving dual woofer, Compound Compression design used in our Digital Sub 600. This approach allows for a cabinet that is just half the size that would otherwise be required. We utilize two 12" woofers arranged in a compound compression (please see diagram) configuration. Their combined output equals the performance of one large and incredibly powerful woofer.

SuperSonic Technology

Special Features
